PROFESSIONAL SUMMARY

Developer Advocate and Full-Stack Developer with proven track record of driving 40% developer community growth and 30% traffic increase through technical content, community engagement, and strategic initiatives. Strong expertise in building scalable applications, creating developer resources, and bridging the gap between technical teams and user communities. Experienced in React, Next.js, Node.js, and AI-powered applications.

EXPERIENCE

Developer Advocate

Sep 2024 – Present

videoSDK

Surat, Gujarat

- Grew active developer community by 40% through technical guidance on Discord, YouTube (1.96k+ subscribers), and Slack, fostering strong engagement and support networks
- Launched AI App Directory that boosted website traffic by 30% and added 500+ monthly active developers in the first month, significantly expanding platform reach
- Authored 20+ technical blog posts generating 50K+ views and driving 15% increase in feature adoption through clear, actionable documentation
- Delivered webinars on SIP, AI agents, streaming, gaming, and calls to 2K+ attendees, growing revenue pipeline by 12% through qualified leads and conversions
- Reduced developer onboarding activation time from 48 hours to 8 hours by creating streamlined internal workflows, improving retention by 25%
- Identified critical developer pain points and advocated for product improvements, resulting in 3 new features shipped within 2 quarters
- Partnered with marketing teams on targeted campaigns, increasing community engagement metrics (posts, reactions) by 50% quarter-over-quarter
- Collaborated with engineering teams to develop sample code, tutorials, and technical documentation for improved developer experience

Full-Stack Developer

Feb 2024 – Jul 2024

Reidnax Dev Solutions

Faridabad, Haryana

- Contributed to wireframing sessions and implemented Figma designs with pixel-perfect accuracy across multiple projects
- Architected and implemented core application logic including authentication systems, form validation, layouts, and state management solutions
- Built responsive frontends ensuring smooth performance and optimal user experience across all device sizes and browsers
- Collaborated with cross-functional teams to deliver features on schedule while maintaining code quality and best practices

YouTube Content Creator

Mar 2022 – Present

@howdevyou

Remote

- Created engaging educational videos on AI, core programming concepts, and frontend development, building a community of tech enthusiasts
- Produced tutorials on latest frameworks and libraries in modern web development, helping developers stay current with industry trends

PROJECTS

DrawBot.chat | AI-Powered Diagramming Tool

2024

- Built AI-powered tool that converts natural language prompts into structured diagrams including flowcharts, state machines, and system architecture visuals
- Implemented natural language processing to interpret user intent and generate accurate, professional-quality diagrams

Personal Blog & Portfolio | Technical Writing & Showcase Platform

2022 – Present

- Published web development tips, tutorials, and insights through engaging blog posts, establishing thought leadership in the developer community
- Showcased personal projects and coding experiments with practical demonstrations, creating a resource hub for tech enthusiasts
